GLAXTIC® CLEANROOM

Fast Access. Controlled Environments. Reliable Separation.

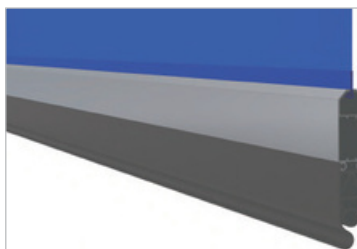

Product Overview

GLAXTIC® CLEANROOM High-Speed Door is designed for controlled indoor environments requiring fast access, reliable separation and frequent operation. Ideal for cleanrooms, production areas and internal process zones, its high-speed opening and effective perimeter sealing help minimise air exchange, dust infiltration and cross-contamination between adjacent areas.

Integrated Tubular Motor

Bottom Bar + Bottom Sealing

Aluminum Alloy Side Guides

Technical Specifications

Max. Opening Size (W x H)	3000 mm x 3000 mm
Opening Speed Closing Speed	0.6-1 m/s 0.6 m/s
Door Curtain	1.8 mm high-strength, high-density, wear-resistant PVC curtain.

Side Guides	High-strength extruded aluminium alloy side guides for smooth operation, durability and corrosion resistance.
-------------	---

Control System

Power Supply	Available in 220V or 380V configurations to suit local power requirements.
Motor	GLAXTIC® servo motor as standard, with optional customised motor configurations available upon request.
Control Panel	GLAXTIC® control panel as standard, with customised control solutions available upon request.

Safety Features

Photo Eye Safety Sensor	If a person or obstacle is detected during closing, the door immediately stops and automatically reopens to the fully open position. Once the obstruction is cleared, normal operation can resume.
